1. POWER INPUT & 12V PROTECTION

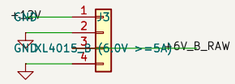

Pluggable screw terminal | 5A cartridge fuse | Reverse polarity P-MOS | 12V TVS

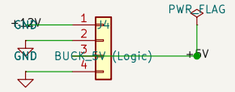

2. STEP-DOWN BUCK CONVERTERS (BREAKOUT MODULES)

Buck A & B: XL4015 >=5A (Preset 6.0V before servos) | Buck C: 5V Logic (MP1584EN)

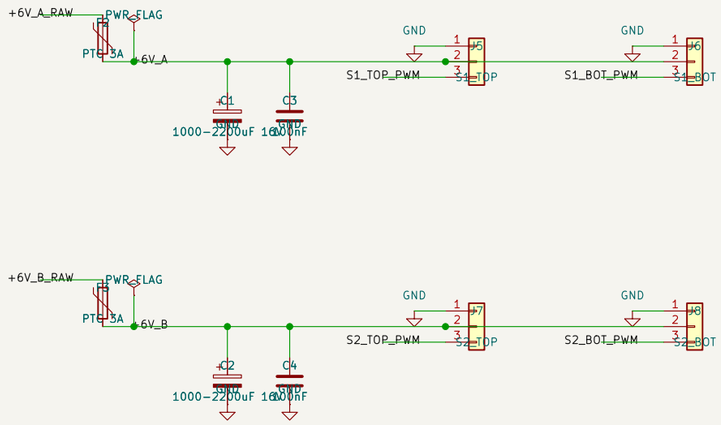

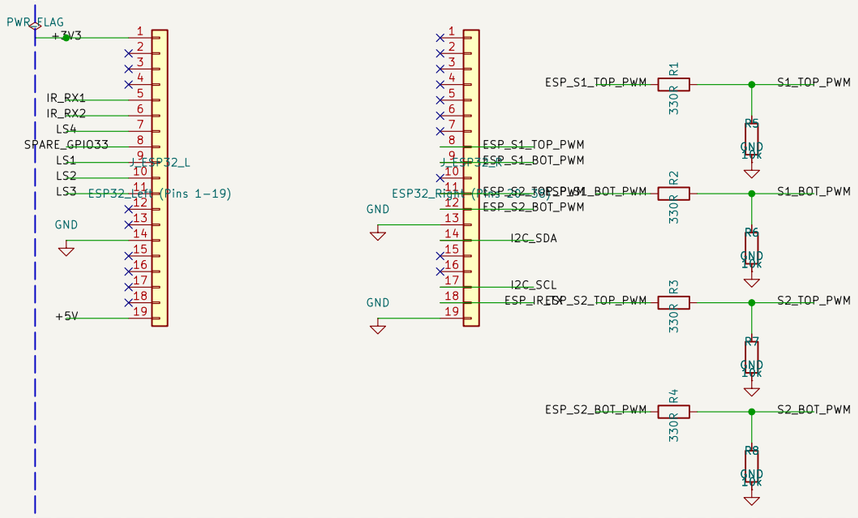

3. SERVO POWER PROTECTION & CONNECTORS

Rail A (Col 1) & Rail B (Col 2): PTC fuse | 1000-2200uF bulk cap | 100nF | MG996R 360 Headers

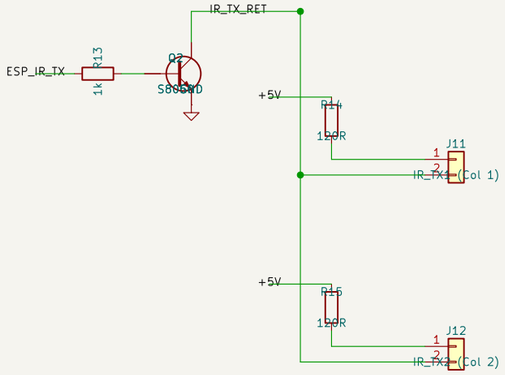

4. ESP32 DEVKIT 38 HEADER INTERFACE & PWM CONDITIONING

Female socket headers | No strapping pins used | 330R series + 10k pull-down boot protection

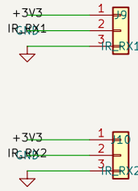

5. IR TRANSMITTER DRIVER CIRCUIT

GPIO23 -> NPN Driver (S8050/2N2222) | 2x JST-XH 2-pin connectors (1 per column)

6. IR RECEIVER HEADERS

3-wire cables to satellite RX sensor boards (38kHz TSOP/VS1838B)

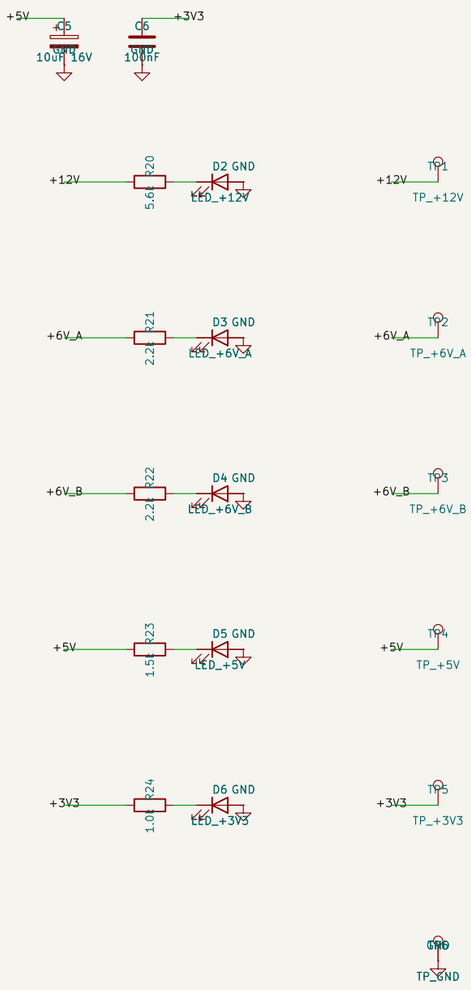

7. LIMIT SWITCHES (OPTIONAL - DNP)

4x JST-XH 2-pin | 10k pull-up to 3V3 | 100nF filter (Not populated in Rev A)

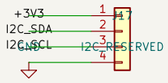

8. DIAGNOSTICS & RAIL DECOUPLING

Power LEDs and dedicated test points for all rails (+12V, +6V_A, +6V_B, +5V, +3V3, GND)

9. AUXILIARY / I2C EXPANSION HEADER

Reserved 4-pin header for optional external display, sensors or I2C expander

2-layer THT | Dual-column FIFO servo & IR control
Code-generated native KiCad 10 schematic
